Appendix A

GENERAL EXPLANATION

CENSUS COVERAGE

Method of Coverage—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 Censuses data for all “employer” establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for “nonemployers” was obtained from Federal income tax records.

In the 1967 Census of Business, service firms were divided into two categories—the “mail” universe and the “nonmail” universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. The “nonmail” universe—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. All “nonemployers”—Consists of all firms with no paid employment during 1967. Receipts information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, the nonemployer segment accounts for only about 9 percent of selected service receipts. (See “Comparison of the 1963 Census With the 1967 Census,” item 4, on next page.)

In the 1967 Census, data for all nonemployer establishments were compiled from tax records. In the 1963 Census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those service nonemployer firms which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. This treatment is the same as in the 1963 Census.

b. Selected “small employers”—“Employers” consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. “Small employers” consist basically of all those single unit firms with payroll

below a specified cutoff. The cutoff varied by kind of business and was designed, in most cases, to limit the “nonmail” group to establishments which would account for approximately 20 percent of total receipts in each kind of business. The “number-of-employee” equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on receipts, payroll, and employment for “under cutoff” employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. The “mail” universe—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b below) was obtained from IRS and SSA records. The “mail” universe includes the following categories:

a. Firms in the census prec canvass—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 Census records of multiunit firms and larger employers.

b. Firms not in the census prec canvass—Other firms included in the “mail” universe consist of other employers than those covered by section 1-b or 2-a above.

Comparison of the 1963 Census With the 1967 Census—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. Classification—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for “nonemployer” firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of “employer” and “nonemployer” establishments are presented in less kind-of-business detail than was the case in 1963. Data

for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm's description of its principal business activity, greater use was made in 1967 of "basket" classifications (e.g., miscellaneous business services).

The 1967 Census classification for the small employer firms (see coverage of employers above) which were not mailed the census report form was based on the following:

a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a "birth" since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedures outlined in a. and b. above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm's description of its principal business activity as entered on its IRS business tax return was used.

To determine the 1967 Census classification for establishments in the mail universe (section 2 above), considerable use was made of "self-designation." However, for kinds of business which posed classification problems, special questions were included to determine the census classification.

In addition to differences in classification based on the method of enumeration, some changes were made in the 1967 Census in the individual kind-of-business classifications which are detailed in the "Kind-of-Business Classification" section below.

2. Areas—The physical area of a number of urban places for which data are shown in the 1967 Census is not the same as it was in the 1963 Census because of annexations and other boundary changes which occurred since 1963.

3. Active proprietors—In the 1963 Census, the number of active proprietors of unincorpor-

ated businesses was computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors for each establishment in business at the end of the year. In this report, the count of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms, including multiunit firms:

- a. All firms in business the full year.
- b. All payroll firms not in business the end of the year but in business during the pay period including March 12, 1967.
- c. Every other nonpayroll firm not in business the full year.

4. Coverage of nonemployers—Although a comparison of data for nonemployer firms from the 1963 and 1967 Censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total service receipts volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms accounting for about one percent of service receipts volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 Census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 Census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible receipts volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those service nonemployer establishments were included in the census which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. While these are the same rules used in the 1963 Census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

5. **Payroll**—In 1963 the inclusion in payroll of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and payrolls reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

Types of Areas Covered—The area reports present data by kind of business for the following areas:

1. The State as a whole.
2. Each standard metropolitan statistical area.
3. Each county.
4. Each "city" of 2,500 inhabitants or more.

The term "city" for purposes of these reports includes places having 2,500 inhabitants or more in the 1960 Census of Population (or later special censuses) and which were incorporated as cities, boroughs, villages, or towns. It does not include towns in New England, New York, and Wisconsin which are not considered "incorporated places" for Census Bureau purposes.

In addition, data are shown for the following areas not classified as incorporated places:

1. Towns in the New England States which had an urban population, by Census of Population rules, of 2,500 inhabitants or more or which had a total population of 10,000 or more.
2. Townships in New Jersey and Pennsylvania which had 10,000 inhabitants or more.

The standard metropolitan statistical areas (SMSA's) for which data are shown are those defined by the Bureau of the Budget.¹ A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than

counties are the units used in defining an SMSA.

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual establishments rather than companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual² for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Leased service departments (separately owned businesses operated as departments of another service establishment or of a retail establishment, such as a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store) are treated as separate service establishments in the selected services portion of the 1967 Census.

Receipts—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1967 whether or not payment was received during 1967. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by

¹Executive Office of the President, Bureau of the Budget, *Standard Metropolitan Statistical Areas, 1967*, as amended January 15, 1968.

²Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual, 1967*.

the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in performing services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of \$1,000 or more; however, their reported receipts have not been projected to a full year's operation.

Payroll entire year—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

Paid employees for the pay period including March 12, 1967—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

Active proprietors of unincorporated businesses—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor and

each partnership with two active proprietors for the following types of firms:

1. All firms in business the full year.
2. Payroll firms not in business the end of the year but in business during the pay period including March 12, 1967.

3. Every other nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

Central administrative offices and auxiliaries—

Each company included in this census was asked to identify and report separately as "central administrative offices" or "auxiliaries" those locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data for such central administrative offices or auxiliary units of service establishments are given in tables 12 and 13 of the individual State reports.

KIND-OF-BUSINESS CLASSIFICATIONS

"Services" as defined in the 1967 edition of the SIC Manual, includes establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification." Descriptions of those kinds of business for which data are provided follow.

HOTELS, MOTELS, TOURIST COURTS, AND CAMPS (SIC Major Group 70, Except 702 and 704)

Establishments engaged in providing lodging or lodging and meals to the general public except (1) rooming and boarding houses, (2) hotels which provide accommodations only for "permanent" residents, and (3) tourist homes. Apartment or residential hotels which

provide accommodations for transients are included. Also included are commercial establishments which provide camping and trailer space or camping facilities on a fee basis.

Hotels, motels, and tourist courts (SIC 7011)

—The 1967 edition of the Standard Industrial Classification Manual combines hotels and motels into a single classification entitled, "Hotels, tourist courts, and motels." In this report, however, data are presented for the following subdivisions of this classification:

1. Year-round hotels, with 25 or more guest rooms.
2. Year-round hotels, with less than 25 guest rooms.
3. Seasonal hotels.
4. Motels, tourist courts.
5. Motor hotels.

The classification of individual establishments into "hotels," "motor hotels," and "motels, tourist courts" was based primarily on the respondent's self-designation.

Trailer parks (SIC 7031)—Establishments known as trailer parks primarily engaged in renting trailer space and providing utilities, such as water and electricity.

Sporting and recreational camps (SIC 7032)—Commercially operated sporting or recreational camps providing lodging or lodging and meals. These include children's camps, summer day camps where the children return home each night, fishing and hunting camps and dude ranches. Camps primarily receiving their financial support from subsidies, donations, contributions, etc., are not included. Also excluded from the 1967 Census of Business are establishments not open to the general public operated by membership organizations to provide camping facilities to members and guests.

PERSONAL SERVICES
(SIC Major Group 72)

Establishments primarily engaged in providing personal services such as barber and beauty shops, cleaning and dyeing plants, laundries, pressing and garment repair shops, and photographic studios.

a fee. Included are establishments known as "laundromats," "launderettes," "self-service dry cleaners," etc. Establishments which install and operate coin-operated laundering machines in apartment houses are included under "Miscellaneous personal services" (SIC 7299). Establishments which rent coin-operated laundering machines, e.g., to apartment houses, are included under "Equipment rental and leasing services" (SIC 7394).

Power laundries, family and commercial (SIC 7211)

—Establishments primarily engaged in operating mechanical laundries with steam or other power. Data for collecting and distributing units (branch outlets and pick-up stations) owned and operated by power laundries are merged with those for the laundry which owned them and are not treated as separate establishments. Independently owned agencies for laundry plants are included in the classification "Garment pressing, alteration, and repair" (SIC 7271). Excluded are establishments which have power laundry equipment but which are primarily engaged in a specialty such as industrial laundering, linen rental, or diaper service. These are presented in separate categories as shown below.

Industrial launderers (SIC 7218)—Establishments primarily engaged in supplying laundered or dry cleaned work uniforms, and laundered wiping towels, safety equipment (gloves, flame resistant clothing, etc.), dust control items such as treated mats or rugs, mops, dust tool covers and cloths, other items to industrial or commercial users. Establishments included in this industry may or may not operate their own laundry or dry cleaning facilities.

Laundries, except power and coin-operated (SIC 7212)—Establishments such as “French,” “Chinese,” and other laundries designating themselves as hand laundries, primarily engaged in furnishing laundry finishing services. Many of these establishments use some power equipment but not of the industrial type.

Dry cleaning plants, except rug cleaning (SIC 7216)—Plants primarily engaged in dry cleaning and dyeing apparel and household fabrics. Establishments primarily engaged in cleaning and repairing rugs are included under “Rug cleaning and repairing plants” (SIC 7217), and establishments which clean rugs on location are included under “Miscellaneous personal services” (SIC 7299). Data for collecting and distributing units (branch outlets) owned and operated by cleaning and dyeing plants are merged with the cleaning plants which owned them and are not treated as separate establishments. Independently owned agencies for cleaning plants are included in the classification “Garment pressing, alteration, and repair” (SIC 7271). Establishments known as “tailor shops” or “cleaners” are included in this classification only if they do their own cleaning.

Rug cleaning and repairing plants (SIC 7217)—Plants primarily engaged in rug cleaning or in rug cleaning and repairing. Establishments which do rug repairing only are classified in “Other repair shops, related service, n.e.c.” (SIC 7699 part); those which do rug cleaning on location and have no rug cleaning plant are classified in “Miscellaneous personal service” (SIC 7299).

This classification includes the following subgroups shown separately only in tables for the United States as a whole.

1. Photographic studios, commercial.
2. Photographic studios, portrait.
3. Photographic studios, commercial and portrait.

Establishments primarily engaged in film developing and/or print processing for the trade or for the general public are included in “Photofinishing laboratories” (SIC 7395); those engaged in motion picture film processing are included in “Motion picture production, distribution, services” (SIC 781, 782).

Such repayments were not included in receipts reported in previous censuses.

"Commercial research and development laboratories."

Testing laboratories which perform supporting services for other establishments of the same company are classified as auxiliary to the establishments serviced.
